## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see p.7 of the response, filed October 18, 2004, with respect to claims 10, 12-20, and 45-47 have been fully considered and are persuasive. The rejection of claims 10, 12-20, and 45-47 has been withdrawn.
2. The arguments concerning the single implantation step of Lin et al. (USPN 6,124,177) and the metal layer (32) have overcome the rejection made in the prior Office action.

### ***Allowable Subject Matter***

3. Claims 10, 12-20, and 45-54 are allowed.
4. The following is an examiner's statement of reasons for allowance: the examiner is unaware of any prior art which suggests a field effect transistor having a gate with at least two different lengths and corresponding sidewalls such that a spacer is formed to create an air gap between the spacer and the first sidewall while also having impurity regions which are aligned to each sidewall.
5. Gardner (USPN 5,990,523) discloses a field effect transistor which has a spacer that creates an air gap between the gate and the substrate. However the gate has only one sidewall. Thus Gardner does not disclose the applicant's device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

Art Unit: 2826

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
